5 Olayiwola Owoiya Street

## About Me

Front-end-focused full stack JavaScript developer with experience building and deploying responsive apps using modern tools like React, Next.js, Node.js, TypeScript, and Tailwind. Passionate about clean code, smooth teamwork, and creating simple, friendly user experiences. Open to frontend or junior developer roles.

## Skills

- JavaScript & React
- Python & Django
- Node.js & Next.js
- Typescript & Tailwind
- Git & GitHub
- Bootstrap & Framer Motion

## Education

### Bsc in Computer Science

*Lagos State University* 2025 - Date

Pursuing B.Sc. in Computer Science with coursework in algorithms, data structures, databases, and software engineering; expected graduation 2029. Completed team projects using Java and Python, and participated in hackathons and CS clubs to apply software development and problem-solving skills.

### Full Stack JavaScript Developer

*The Odin Project* 2025 - Date

Completed a project-based Full Stack JavaScript program focused on building production-ready, maintainable web applications. Built 5+ responsive projects using HTML/CSS, JavaScript, React/Next.js, and Node.js/Express; implemented RESTful APIs, authentication, and persistent storage; deployed apps on Vercel. Practiced Git workflows, code reviews, and automated testing to ensure code quality and scalability.

## Experience

### Graphic Designer

*Adebayo Tech Cafe* 2018 - 2020

Designed marketing materials (flyers, banners, social media graphics) and maintained cohesive brand identity across campaigns.

Collaborated with clients to transform briefs into effective visual solutions and delivered assets optimized for web and print.
Created reusable templates and a basic design system to speed up production and ensure consistency.

### Full Stack JavaScript Trainee

*The Odin Project* 2025 - Date

Built 5+ responsive web applications using HTML, CSS, JavaScript, and React/Next.js; deployed projects on Vercel, and Render. Implemented back-end services and RESTful APIs with Node.js and Next.js/Express, and integrated authentication and persistent storage.

Collaborated on open-source projects and team exercises to design user-focused interfaces and improve functionality. Participated in code reviews, followed Git workflows, and applied object-oriented principles and testing to maintain code quality.
